

Monthly Management Report

The Monthly Management Report has been designed help easily summarise all monthly farm data in one place. The report is designed to be generated at the start of a new month, once all of the previous month's actuals have been entered. It provides an easy-to-interpret report that can be exported to provide to management, or to be archived.

Example Monthly Management Report

	July 2015 Management Report for Farmax Example
---	---

General	
Name	Value
Farm Name	Farmax Example
Month	Jul 15
Author	Ms. Farmax
Sharemilker	Enter MS for June

Notes
<i>Jul 15</i>
<p>WEATHER</p> <p>70ml rainfall 10 degrees soil temp</p> <p>STOCK</p> <p>2 cows put down for Johnes disease 1 cow died - unknown cause</p> <p>SEASON UPDATE</p> <p>Calving started on July 13th - all going ok so far</p>

In FARMAX Professional Dairy, this report is found at the Farm-level -> data input panel -> Reports section.

In FARMAX Performance Monitoring, this is added to the reports section, below the data Input screen.

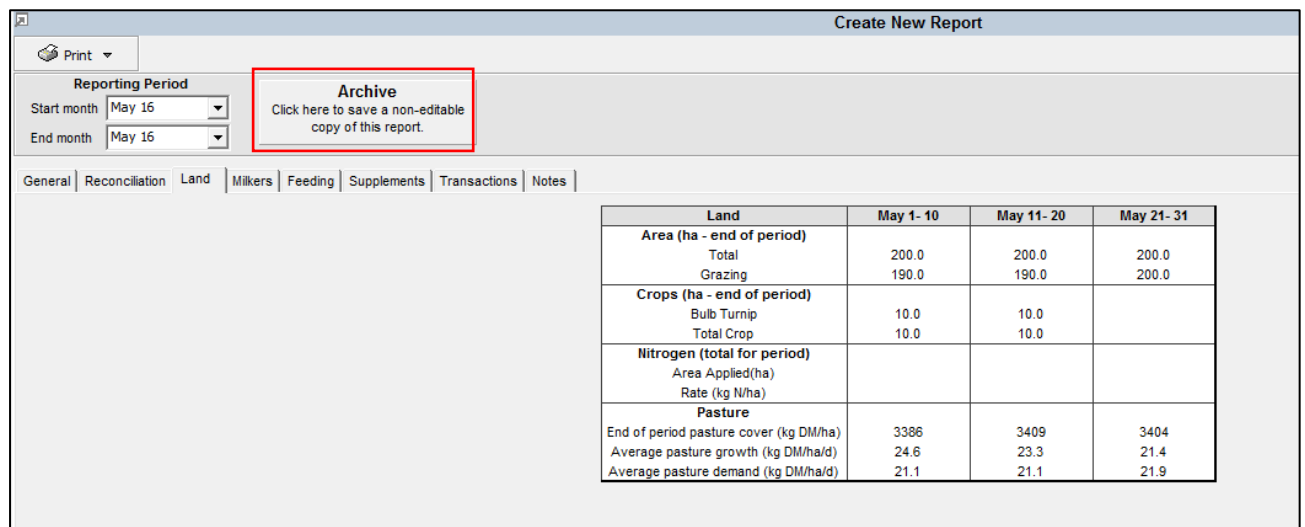

Creating a report is relatively self-explanatory;

1. Select 'Create New Report' (red outlined below),
2. Specify the reporting period and the tables in the tabs will extract the relevant data from the FARMAX file (For example the Land table below).

Creating a new Monthly Management Report

Once all the monthly data has been checked and comments added where relevant, the Archive button (outlined red below) enables you to save a non-editable version of the report.

Example table from the Monthly Management Report; Land

Over time, this archived library of reports can serve as a useful quick reference tool – they can be retrieved for years prior to the file start date.
